

## **Draft Strathfield South Subcatchment Community 2050 Vision statements**

Our community is well educated in sustainability and individuals are aware of their responsibility to care for the environment. Industry and residents are sustainable water users who live in harmony with the environment including the Cooks River which is an oasis enjoyed by all.

### **Sustainable Technology**

Industry and residents are sustainable water users through innovative architecture, water saving devices, grey water systems, appropriate use and the capture of storm and rain water in communal and individual storage systems.

### **Subcatchment Management**

The Strathfield South Subcatchment has more green space; industry, pollution and water use are reduced, and the Cooks River foreshore is an 'oasis' that can be enjoyed by all.

### **Natural Environment**

Our community is well educated in sustainability, there is increased investment in research, and water conservation is taught in all schools. Individuals are active in the community and are aware of their responsibility to care for the environment.

### **Education and Research**

The natural environment and water sources are preserved, restored and cared for so that we have clean, natural water systems and microclimates. We live in harmony with the environment and living with less water is a way of life.
