

Residents of Munni Street Subcatchment are invited to take part in an online survey. The results will be used to decide what type of community water education project/s the OurRiver team will develop and implement in your local area. The survey is available to complete online at <http://www.surveymonkey.com/s/MXNWCJVJ> and should only take 5-10 minutes - the closing date is **Wednesday 24 March**. Once you complete the survey you are able to **enter a prize draw to win** a Hughie Sink Water Saver and a book entitled Waterwise House & Garden (**valued at \$55**).

In addition to the survey an optional information session will be held on **Tuesday 16 March**, 6:30-8:00pm at the Cliff Noble Activity Centre, Renwick Street, Alexandria. The information session will include an OurRiver project update and an opportunity to ask questions and discuss community water education ideas in person. Paper copies of the online survey will also be available to complete on the night. Dinner will be provided. To RSVP please contact Susan Pritchard (see contact details at bottom of the page).

How will the survey results be used?

The results will be used by the OurRiver team to decide what type of community education project/s will be implemented in your local area. The decision will be made using the following criteria:

1. The project must contribute to the community water vision and goals developed by members of the Munni Street Subcatchment community (the Subcatchment is a defined area that includes parts of Alexandria, Darlington, Erskineville, Eveleigh and Newtown).
2. The project must meet local community requirements as determined by the survey.
3. The project must be able to be implemented by September 2010.

What is OurRiver?

The OurRiver project is working with local communities and councils to improve the health of the Cooks River, and to promote more sustainable water management in urban areas. The project is a partnership between eight councils, the Cooks River Foreshore Working Group and Monash University, and is funded by the NSW Environmental Trust.
